FOR APPLICANTS

tutional officials con-
in the folder entitled,
d Terms Under Which

Project Grants Are Made."

Human Subjects

For any studies that involve human subjects, the Council requires annual institutional certification that adequate informed consent has been obtained. This will be done on a form furnished by the Council.

Completeness of Applications

Please provide all information and signatures requested on application forms. Use additional sheets as necessary. The accompanying check-off sheet contains more specific information.

Submission of Grant Applications

Deadlines for submission of all copies of a full application are November 30 and May 31. Normally grants are made for a period of one year with activation on January 1 or July 1. A renewal application with status report must be filed 7 months before the anniversary date of the grant. This is the grantee's responsibility. A formal progress report is always required upon termination of any CTR project.

Grants in Amounts Less Than Requested

Sometimes grants are made in amounts less than requested. In such event, a revised budget including new signatures must be submitted.

Priority in Awarding Renewals

Although grants can be made for one year only, many studies are designed to extend over a longer period. In these cases, consideration will be given to renewed support up to an inclusive total of three years in annual competition for available funds. Nevertheless, a renewal application and appropriate status report are required each year before the request can be considered.
